ABOUT THE PUBLISHER

Established in 1982, the Canada-based *Éditions Michel Quintin* initially focused on publishing popular science books about animals, nature, and the environment. Thanks to the dedication of a savvy, dynamic team with an eye for daring, original ideas, the publishing house list later grew to include all genres of novels and comic books in addition to educational and reference guides.

These efforts to publish an increasing variety of quality fiction and non-fiction have resulted in prestigious awards and a loyal following of young and adult readers over the years. Around fifty new titles are added to the in-house catalogue every year, which now consists of 600 publications, including several bestsellers and international editions.

BILLY STUART

billystuart.com

Alain M. Bergeron
Ill. : Sampar

8 years +
 Approx. 160 full-colour pages
 15 x 19 cm
 \$14.95

Billy Stuart aspires to be just like his grandfather, a fearless adventurer. When the young raccoon learns that his grandfather had found a way to travel through time, he sets out to follow him. What Billy doesn't know is that once he goes down that fateful path, there's no turning back. Games, puzzles and humour enhance each title in this series from the famous duo Bergeron-Sampar.

Rebel, artist, hip, highly trendy, the dragouilles all have a personality of their own. They live on the roofs of buildings around the world and lead children into their own universe.

These humorous and intelligent documentaries about different cities are brighten up by cool tricks, comic strips, informative capsules, captivating chronicles and amazing challenges.

Online Book Trailer**THE IRON LADY**

When we think of Paris, the Eiffel Tower naturally comes to mind. This "300 metre tower," a real symbol of the city, has reigned over Paris for more than one hundred years.

On the occasion of the 1889 Universal Exhibition, which was held to celebrate the 100th anniversary of the French Revolution, Paris wanted to attract the attention of the entire world by building a spectacular monument. From among the 700 projects presented, officials chose the design of Gustave Eiffel, an engineer specialized in metal structures. His ambitious project was to build the highest tower in the world at the time.

Eiffel and his team drafted more than 5,000 drawings before starting construction. Although Eiffel had planned to finish the construction of his tower within 12 months, it took almost double that to put together the 18,000 pieces of iron with 2.5 million rivets.

The tower, which is named after its inventor, is today's most visited monument in Europe and the most photographed in Paris. To look good in front of all these admirers, the Iron Lady has to be a tiny bit coquette! So, it gets a makeover approximately every seven years. This facelift requires seven tons of paint and ten tons of rust inhibitor!

PLANÉTIARIUM
DE MONTRÉALSOCIÉTÉ D'ASTRONOMIE
DU PLANÉTIARIUM DE MONTRÉAL

Earth, Moon and Sun

I'm Going to Be an Astronomer

The Circuit of the Planets

LA TERRE, PLANÈTE ACTIVE

Chaque jour, la télévision et les journaux nous rappellent que la Terre est une planète agitée: tremblements de terre, éruptions volcaniques, glissements de terrain, raz-de-marée... Ces phénomènes ont des effets dévastateurs, mais ils aident les scientifiques à comprendre ce qui se passe à l'intérieur de notre planète.

LA TERRE EST UN ŒUF!

L'intérieur de la Terre est fait de trois couches. À la surface, il y a la **croûte terrestre**, c'est-à-dire la partie solide sur laquelle nous marchons. Sous cette croûte, on trouve le **mantau**, constitué de roches en fusion qu'on appelle le magma. Cette matière brillante remonte parfois à la surface sous forme de lave crachée par les volcans. Enfin, le centre de la Terre est occupé par un **noyau** de fer et de nickel. Si la Terre avait la taille d'un œuf, la croûte serait aussi mince que la coquille, le manteau aurait la même épaisseur que le blanc, et le noyau serait gros comme le jaune de l'œuf!

TREMBLEMENTS DE TERRE ET VOLCANS

La croûte terrestre est divisée en plusieurs grands morceaux; on les appelle les **plaques tectoniques** et elles flottent littéralement sur le manteau en déformant les unes par rapport aux autres. Lorsque deux plaques entrent en collision (A), la croûte se plisse et forme des volcans et de hautes montagnes. Par exemple, l'Inde s'enfonçait présentement dans l'Asie ce qui soulève les montagnes de l'Himalaya. Lorsqu'au contraire deux plaques s'écartent (B), le magma contenu dans le manteau remonte à la surface et se solidifie. Ces mouvements incessants de la croûte terrestre provoquent de nombreux tremblements de terre et de violents raz-de-marée.

LA DÉRIVE DES CONTINENTS

As-tu remarqué que, de part et d'autre de l'océan Atlantique, les continents pourraient s'imbriquer comme les pièces d'un casse-tête? C'est parce qu'il y a 250 millions d'années, ces continents étaient sous les uns aux autres et formaient un seul et unique continent géant qu'on appelle aujourd'hui la Pangée.

A cette époque, l'océan Atlantique n'existait pas, et le Pacifique était beaucoup plus vaste qu'aujourd'hui! Depuis, l'Amérique du Nord et l'Europe sont entraînés par la dérive des plaques tectoniques et s'écartent à raison de trois centimètres par année.

Il y a 250 millions d'années Il y a 125 millions d'années Aujourd'hui

DES «POINTS CHAUDS»

Le manteau terrestre comporte certains «points chauds» où la chaleur s'accumule tellement que la croûte terrestre finit par se percer au beau milieu d'une plaque tectonique. Ce type d'éruption crée des volcans qui ont la forme de boucliers et qui sont parmi les plus gros de notre planète. Par exemple, le volcan Mauna Kea, sur l'île Hawaï, s'élève à 10,2 km d'altitude au-dessus du fond de l'océan Pacifique!

Le Coca-Cola est une boisson inventée en 1886 par un pharmacien dans le but entre autres de traiter l'impuissance.

ou hormonaux) peuvent expliquer cette condition. Sur le plan médical, le rétrécissement des vaisseaux sanguins (artériosclérose), certaines maladies (comme le diabète), un traumatisme à la moelle épinière à la suite d'un accident, une hernie discale ou des niveaux trop bas de testostérone sont des facteurs possibles de dysfonction érectile. On sait par ailleurs que le fait de fumer et de consommer de l'alcool ou des stéroïdes anabolisants en trop grande quantité peut contribuer de manière importante au problème.

On a déjà vu l'hypothèse que la circoncision pouvait jouer un rôle dans les capacités d'érection ou d'éjaculation. Mais selon la plupart des études sur cette question, le fait d'être circoncis ou non n'aurait aucune incidence sur les fonctions érectiles ou éjaculatoires. **L'Organisation mondiale de la Santé estime que 30 % des hommes seraient circoncis à l'heure actuelle.** La circoncision est une opération qui consiste à couper la partie supérieure du prépuce, ce repli de peau qui entoure le gland. L'usage ne date pas d'hier: son origine remonterait à l'Égypte antique. Un peu partout dans le monde, la circoncision est courante et systématique, pour des motifs religieux ou culturels, par exemple chez les Juifs, les musulmans, des peuples africains ou asiatiques. Elle est généralement pratiquée sur les garçons en

Même la nature
n'y peut rien.

De tous temps, et pratiquement dans toutes les cultures, les humains ont

cherché et attribué des vertus aphrodisiaques à des plantes, à des parties ou organes d'animaux, voire à des substances produites par les insectes, pour maintenir intact ou stimuler l'impact sexual: le ginseng, la ginsengère, la calopaneille, la sametie, le chocolat, les huîtres, les testicules d'ours, la palée

Si la circoncision ne semblait pas être une source potentielle de trouble érectile, une équipe de chercheurs de l'École de médecine d'Ankara

La forme de cet os particulier varie elle aussi grandement: l'os périen de l'ours noir, du loup et du coyote est simple et droit; celui du blaireau est menché à son extrémité. Certaines espèces

Vite fait bien fait
Chez certains canards, le pénis se déploie à une vitesse qui peut atteindre les 120 km/h.

se fait petit : environ 15 mm chez l'orang-outan (pour une verge de 3 à 4 cm), 12 mm chez le gorille (pour une verge de 5 cm) et 6 mm chez le chimpanzé (pour une verge de 8 cm). Ainsi, plus on se rapproche d'*Homo sapiens*, plus l'os pénien raccourcit et le pénis allonge.

L'homme au sexe d'or
La vedette italienne de cinéma porno Rocco Siffredi, qui a tourné dans plus de 230 films et que l'on a surnommé « l'homme au sexe d'or », a fait mesurer sa verge par un hussier pour gagner le titre de « l'homme au sexe le plus long du monde ». Résultat: 24,5 cm de longueur et 15 cm de circonférence en érection.

Oui, le pénis humain est d'une taille considérable en érection si on le compare à ceux des 249 espèces de primates. Objectivement, il fait malgré tout figure de nain en comparaison de bien d'autres. Par exemple, ceux de l'éléphant (1,5 m), du requin

LONGUEUR DU PÉNIS PENDANT LA COPULATION*

Humain	de 14,5 à 15,7 cm
Chimpanzé	8 cm
Gorille	5 cm
Orang-outang	de 3 à 4 cm
Mouton	0,5 cm
Chauve-souris	de 0,9 à 1,2 cm (selon les espèces)
Cheval	60 cm
Éléphant	100 cm
Monse	80 cm
Rorqual bleu	de 270 à 300 cm
Canards	de 10 à 40 cm (selon les espèces)
Autruche	40 cm
Limax neri (escargot terrestre)	85 cm
Anouéte	20 cm (plus long pénis du règne animal)

Si l'immense majorité des oiseaux (97 %) n'ont pas d'organe copulateur externe, ceux qui en possèdent un sont bien membres. Le pénis de l'autruche atteint 40 cm en érection. Celui de l'émigrateur orné, un canard d'Amérique du Sud, s'étire jusqu'à une impressionnante 42,5 cm. Mais dans ce dernier cas, c'est davantage la forme qui intrigue : le pénis est en tire-bouchon et couvert de minuscules épines qui évoquent une brosse à récurer (cela permettrait à son propriétaire, ayant

* L'ordre dans lequel sont présentées les espèces sera le même pour tous les tableaux: primates, autres mammifères terrestres, mammifères

HISTORICAL FICTION

A WHITE SLAVE IN NEW FRANCE

Céline Daignault
Léonard Priest

360 pages
14.5 x 21.5 cm
\$19.95

In 1704, the violent collision of the English, French and Amerindian worlds is shaping the future of North America. During a raid in the dead of winter, a hundred people are kidnapped and forced to march the five hundred odd kilometres between them and Montreal. Many will lose their lives on the journey. Others will be sold into slavery.

ADELAIDE – THE HEART OF THE REGENT

Linda Sayeg

360 pages
14.5 x 21.5 cm
\$29.95

Despite being in love with Philippe d'Orléans, Adelaide cannot resist her attraction to Louis-Auguste de Bourbon on meeting him. But the king, who plans to arrange princely marriages for his bastards and to destroy all threats to his absolute power, arranges marriages that have all the makings of a mismatch. Adelaide is forced to exile herself to New France. She returns in 1718 to a Paris that is experiencing a new vibrancy thanks to Philippe d'Orléans. In her heart, however, nothing has changed.

THE EDUCATION OF A COURTESAN

Linda Sayeg

572 pages
15 x 23 cm
\$29.95

1558. France is being torn apart by both the power struggle between the houses of Guise and Bourbon, and the growing war between Protestants and Catholics. In the tense climate that reigns over the country, Clemence de Lonjais leaves her native Gascony for the king's court. The young girl who expects the sovereign's favourite to arrange an advantageous match for her will soon discover that Catherine de Medici has other plans for her.

THE DUCHESS OF ANGLASE

Linda Sayeg

496 pages

2113. A young woman with amnesia. A troubled past, marked by death and suffering. A sprawling city where only the rich have access to the sunlight. A scientist on a quest for immortality.

Genetic modifications that exceed anything thought possible. The truth at last.

Except it's even more horrifying than all the lies.

From the author of the successful series Luna that has sold over 150,000 copies.

VERMILLON

Laurent Chabin

Approx. 320 pages

13 x 21 cm

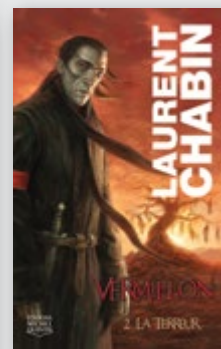

\$17.95

In her uncivilized homeland, Garance has known nothing but misery since birth. She escapes on the day that all the Damned, her parents included, are murdered by a horde of bloodthirsty warriors. In a never-ending battle against a cruel emperor, she and several others are ready to do anything to give their people back their dignity.

14 x 21 cm

\$24.95

On April 19th, 1925, William Black decides to free the Agrippa, which has been imprisoned in the crypt of st. Matthew's church since October 1855. The 44-year-old man, a power-hungry practitioner of the dark arts, is unscrupulous. The release of this book of dark spells will have grave consequences, and the inhabitants of the small community will not be spared.

THE MAN WITHOUT A NAVEL

Michel Leboeuf

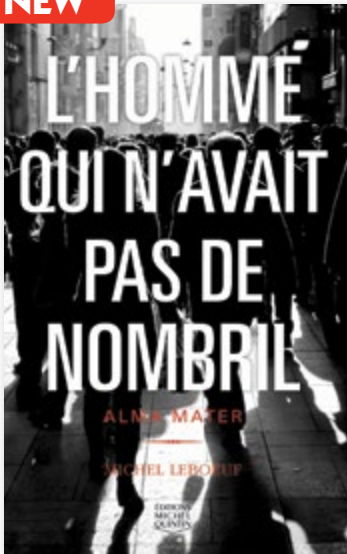

Approx. 350 pages
13 x 21 cm
\$19.95

Late November. Mother has been dead for three weeks. And I still feel nothing.

“My name is Philippe Morel. I’m 53 years old. I’m a communications professional. Apart from my car, my laptop, my tablet, my iPhone, Lanvin, Gucci and Hugo Boss, I have few friends. I can’t form connections with others, the living, the organic. It’s strange, but that’s the way it is. And it’s probably due to the fact that I don’t have a navel...”
